DETAILED ACTION

- This action is responsive to the following communication: an Amendment filed on 11/23/05.
- Claims 1-9 are pending in the present application. Claims 1-9 are amended.

Response to Arguments

Applicant's arguments, see pages 10-15, filed on 11/23/05, with respect to claims 1-9 have been fully considered and are persuasive. The prior art rejection of claims 1-9 has been withdrawn.

Allowable Subject Matter

Claims 1-9 are allowable over prior art of record. The following is an examiner's statement of reasons for allowance: The cited prior art (U.S. Patent No. 5,960,414 to Rand et al) of record teaches an excess inventory system that monitors inventory within the manufacturing section which determines the percentage of inventory that is designated for use by a customer then maintain a consistent number of material in the inventory, but the prior art of record fails to teach and/or suggest " a print management server which administrates production management information based on the customer order, and transmits the information to the manufacturing section to order photosensitive materials" as recited by amended claims 1 and 6.
